(a)
quasi-static staircase
conductance $I/V$ (mS)
electrode voltage $V$ (V)
stochastic (framework), up
stochastic (framework), down
mean-field (N1), up
mean-field (N1), down
(b)
mean-field junction voltages
and ON probabilities
drop (V) or probability (-)
electrode voltage $V$ (V)
largest junction drop, up
$V_{th}$
mean $P_j$, up
fraction $P_j > 0.5$, up
